Cheatsheet:Scikit Learn

Scikit-Learn is the most popular and widely used library for machine learning in Python.

Pre-Processing

	Function	Description
1	sklearn.preprocessing.StandardScaler	Standardize features by removing the mean and scaling to unit variance
2	sklearn.preprocessing.Imputer	Imputation transformer for completing missing values.
3	sklearn.preprocessing.LabelBinarizer	Binarize labels in a one-vs-all fashion
4	sklearn.preprocessing.OneHot Encoder	Encode categorical integer features using a one-hot a.k.a one-of-K scheme.
5	sklearn.preprocessing.Polynomial Features	Generate polynomial and interaction features.

Regression

	Function	Description
1	sklearn.tree.DecisionTreeRegressor	A decision tree regressor
2	sklearn.svm.SVR	Epsilon-Support Vector Regression
3	sklearn.linear_model.Linear Regression	Ordinary least squares Linear Regression
4	sklearn.linear_model.Lasso	Linear Model trained with L1 prior as regularizer (a.k.a the Lasso)
5	sklearn.linear_model.SGDRegressor	Linear model fitted by minimizing a regularized empirical loss with SGD
6	sklearn.linear_model.ElasticNet	Linear regression with combined L1 and L2 priors as regularizer
7	sklearn.ensemble.RandomForest Regressor	A random forest regressor
8	sklearn.ensemble.GradientBoosting Regressor	Gradient Boosting for regression
9	sklearn.neural_network. MLPRegressor	Multi-layer Perceptron regressor

Classification

	Function	Description
1	sklearn.neural_network.MLP Classifier	Multi-layer Perceptron classifier
2	sklearn.tree.DecisionTreeClassifier	A decision tree classifier
3	sklearn.svm.SVC	C-Support Vector Classification
4	sklearn.linear_model.Logistic Regression	Logistic Regression (at.k.a logit, Max Ent) classifier
5	sklearn.linear_model.SGDClassifier	Linear classifiers (SVM, logistic regression, a.o.) with SGD training
6	sklearn.naive_bayes.GaussianNB	Gaussian Naive Bayes
7	sklearn.neighbors.KNeighbors Classifier	Classifier implementing the k-nearest neighbors vote
8	sklearn.ensemble.RandomForest Classifier	A random forest classifier
9	sklearn.ensemble.GradientBoosting Classifier	Gradient Boosting for classification

Clustering

	Function	Description
1	sklearn.cluster.KMeans	K-Means clustering
2	sklearn.cluster.DBSCAN	Perform DBSCAN clustering from vector array or distance matrix
3	sklearn.cluster.Agglomerative Clustering	Agglomerative Clustering
4	sklearn.cluster.SpectralBiclustering	Spectral bi-clustering

DimensionalityReduction

	Function	Description
1	sklearn.decomposition.PCA	Principal component analysis (PCA)
2	sklearn.decomposition.Latent DirichletAllocation	Latent Dirichlet Allocation with online variational Bayes algorithm
3	sklearn.decomposition.SparseCoder	Sparse coding
4	sklearn.decomposition.Dictionary Learning	Dictionary learning

Model Selection

	Function	Description
1	sklearn.model_selection.KFold	K-Folds cross-validator
2	sklearn.model_selection.Stratified KFold	Stratified K-Folds cross-validator
3	sklearn.model_selection.TimeSeries Split	Time Series cross-validator
4	sklearn.model_selection.train _test_split	Split arrays or matrices into random train and test subsets
5	sklearn.model_selection.GridSearch CV	Exhaustive search over specified parameter values for an estimator.
6	sklearn.model_selection.Randomized SearchCV	Randomized search on hyper parameters.
7	sklearn.model_selection.cross_val_ score	Evaluate a score by cross-validation

Metric

	Function	Description
1	sklearn.metrics.accuracy_score	Classification Metric: Accuracy classification score
2	sklearn.metrics.log_loss	Classification Metric: Log loss, a.k.a logistic loss or cross-entropy loss
3	sklearn.metrics.roc_auc_score	Classification Metric: Compute Rece iver operating characteristic (ROC)
4	sklearn.metrics.mean_absolute_error	Regression Metric: Mean absolute error regression loss
5	sklearn.metrics.r2_score	Regression Metric: R^2 (coefficient of determination)regression score function.
6	sklearn.metrics.label_ranking_loss	Ranking Metric: Compute Ranking loss measure
7	sklearn.metrics.mutual_info_score	Clustering Metric: Mutual Information between two clusterings.

Miscellaneous

	Function	Description
1	sklearn.datasets.load_boston	Load and return the boston house-prices dataset (regression)
2	sklearn.datasets.make_classification	Generate a random n-class classifi-cation problem
3	sklearn.feature_extraction.Feature Hasher	Implements feature hashing, a.k.a the hashing trick
4	sklearn.feature_selection.SelectK Best	Select features according to the k highest scores
5	sklearn.pipeline.Pipeline	Pipeline of transforms with a final estimator
6	sklearn.semi_supervised.Label Propagation	Label Propagation classifier for semi-supervised learning
